PROJECTS

SMARTCOLLEGEBUS TRACKING APP

DEC 2024 – JAN 2025

Developed an intelligent college bus tracking system focused on improving student transportation convenience and safety through real-time location monitoring and efficient route management. The project was designed with a user-friendly interface to enhance accessibility and provide a seamless tracking experience for students and administrators.

MACHINE LEARNING AND AI-BASED HAZARDOUS AGROCHEMICALS SCENT DETECTION SYSTEM

JAN 2026 – APR 2026

Designed an innovative AI-driven hazardous scent detection system aimed at improving rural and agricultural safety. The project utilized machine learning concepts and gas sensor technology to identify harmful agrochemical exposure at an early stage, helping to promote safer environmental and working conditions.

KUMARAN HOME SERVICE – LIVE SERVICE BOOKING WEBSITE

JUL 2026 – AUG 2026

Developed and deployed a responsive home service booking website using Python (Flask), HTML, CSS, and JavaScript. Integrated WhatsApp-based booking for instant customer requests. Designed a mobile-friendly interface with clean navigation and modern UI. Hosted the application on Render using Git and GitHub. Enhanced the customer booking experience by providing a fast, simple, and accessible online service platform.

ADDITIONAL INFORMATION

Certification

- NPTEL – The Joy Of Computing In Python
- NPTEL – Soft Skills
- Infosys Spring Board

Achievements

- Participated in the IDE Bootcamp, Trichy to enhance startup development and innovation skills
- Participated and secured 5th Place in the project expo (UXPLORERS).
- Participated in the Inter Business competition.
- Published a research paper on an Machine Learning and AI-Based Hazardous Agrochemicals Scent Detection System.
